WORK EXPERIENCE

Skillanto Pvt. Ltd.

2024 - Present

- Developed websites from front to back end using PHP, JavaScript, HTML, and CSS. Enhanced user experience and accomplished webpage objectives by creating site structure, navigation, page optimization, and graphics integration. Implemented enhancements that improved web functionality and responsiveness. Designed and maintained both corporate and client websites using scripting languages. Recently, developed a dynamic front-end for a travel platform using ReactJS and Tailwind CSS, improving responsiveness and overall aesthetics.
- Tools & Technologies: HTML5, CSS3, JavaScript, jQuery, PHP, ReactJS, Tailwind CSS.

PROJECTS:

Tec-Centric

- Tech Stack: PHP, MySQL, HTML, CSS, JavaScript
- Tec-Centric is a comprehensive service platform designed for job seekers and employers, offering an intuitive interface for browsing, searching, and applying for jobs. Employers can easily post job listings, manage applications, and connect with potential candidates. The platform focuses on usability and functionality, ensuring responsiveness and a stylish design that streamlines the job search and hiring process. Key features include efficient job listing management, secure data handling, and real-time application tracking, making job searches and candidate connections fast and effective.

Prayatanam-Bharati

- Tech Stack: ReactJS, Tailwind CSS
- Paryatanam Bharati is a dynamic and user-friendly front-end application that serves as a comprehensive travel and tourism platform. It provides an intuitive interface for users to explore and book various travel packages, accommodations, and activities. The application includes detailed information on popular destinations, travel tips, and a personalized enquiry form for assistance. With a strong emphasis on usability and functionality, Paryatanam Bharati enhances the travel planning experience, making it efficient and accessible for all users.
